DETAILED ACTION

1. Claims 6, 9, 13, 26, 29-30, 32-33 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 6, the closest prior art Hasegawa et al. (US 5,666,191) fails to show or fairly suggest a method of preventing comprehension of a printed document, the method comprising: the first pattern of symbols including a line spacing, a paragraph spacing, and a margin spacing of the printed document, wherein the symbols of the first pattern include at least one of characters or numerals.

Regarding claim 9, the closest prior art Hasegawa et al. (US 5,666,191) fails to show or fairly suggest a method of preventing comprehension of a printed document, the method comprising: selecting a negative image of at least one identified character of the printed document and printing the negative image about the at least one identified character of the printed document to produce a substantially uniform thickness of ink or toner for the combination of the at least one identified character and the negative image of the at least one identified character on the printed document, wherein the whitespace portion comprises an area surrounding the at least one identified character and defined by the printed negative image of the identified character;

randomly selecting characters and printing strings of the selected characters at randomly selected angles on the printed document; and

randomly selecting characters and printing the selected characters individually at angles rotated relative to existing characters of the printed document.

Regarding claim 13, the closest prior art Hasegawa et al. (US 5,666,191) fails to show or fairly suggest a method of preventing comprehension of a printed document, the method comprising: randomly selecting a plurality of content-free words and printing the selected words in a non-grammatical order as the at least one obfuscation pattern in the at least one whitespace portion of the printed document with the selected words printed in at least one of a repeating pattern and a non-repeating pattern.

Regarding claim 26, the closest prior art Hasegawa et al. (US 5,666,191) fails to show or fairly suggest a computer readable medium having computer-executable instruction for performing a method of obfuscating a printed document, the method comprising: manipulating the word pattern includes selecting a plurality of words, blackouts, and overstrike characters for overprinting onto the at least one whitespace portion and the at least one text portion to obfuscate natural language word groupings of the text portion of the printed document.

Regarding claims 29-30, 32-33, claims 29-30, 32-33 are allowable due to dependence from their respective base claims.

Conclusion

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
